Job Title: Plumbing Designer

Location: New York, NY (Primary)

Career Level: Experienced (Non-Manager)

Category: Residential Plumbing Design

Job Description:

We are seeking an experienced **Plumbing Designer** for large residential housing projects in the New York City area.

The plumbing designer will be working on a variety of projects as assigned with overall responsibility for the technical quality of the plumbing system design throughout the project. The Plumbing Designer will coordinate with all local authorities and will remain involved with the project through construction completion. Develop sections and details from plans and engineering data. Detailed coordination with the architect, other consultants and the mechanical and electrical departments is required at all times in order to provide the client with accurate construction documents while meeting project deadlines.

Requirement:

- Associate degree in Drafting Technology or related.
- 3+ years of experience in the design of plumbing and fire protection systems in residential buildings.
- Experience with AutoCAD and Revit software.
- Ability to prepare and maintain engineering drawings and other documentation.
- Good problem solving skills (to resolve design problems).
- Field experience in performing verification of industrial mechanical systems is a plus.
- Excellent written and oral communications skills
- Strong organizational skills-self-starter able to effectively work independently or as part of a team.
- PC Proficient: MS Office, Word, Excel, Outlook.
